MEDICAL PREVENTION SCREENING PROGRAMS

Medical prevention programs

Under following conditions:

- Local doctors or specialist can be invited by the CHC to organize camps to inform people of the community about health and diseases and organize screenings programmes
- Only in case there is no other local doctor or doctor from abroad who already claimed this specific area of healthcare and has set up a long-term program
- At least it should fit in the larger framework of the vision of Medora/CHC/CHCN

Medical prevention and Screening programs

Under following conditions:

- These initiatives should be placed in a larger framework with local involved health workers
- With a vision about future and intention to set up programmes lasting at least 5 years
- In cooperation with a specialist of local hospitals so they will be involved and invited to participate
- The initiating doctor works on behalf of Medora or on behalf of his own foundation in cooperation with Medora / CHC/ CHCN
- Financial consequences will be part of the financial administration of CHC and will be specified
- The initiating doctor will contribute in the cost of exploitation of the CHC according the use of the CHC and team members
